

Walton Family Foundation Grant (2021)

What we are focusing our work on

Scale Lab

Facilitate a year long action learning lab to accelerate action on 3 high impact pathways that will increase the scale of impact for supply chain programs.

Regional Regenerative Feed Hubs

Use feed commitments to integrate small grains into existing supply chain programs to make small grain feed accessible in greater volumes.

Soil Health Leadership Lab

Support soil health orgs to learn together about best practice for effective farmer engagement and supply chain work. 2021 focus is on economic tools and coaching in partnership with Farm Credit Services.

De- Commodification Tools

Support action learning in supply chain programs around the use of different contracting tools to pull more regenerative practices on the landscape.
